

Product Information

Sportsmaster[®] WSF

High N 35-0-14+0.13Fe

35+0+11.6+Fe

New packaging 2013

Product description

Sportsmaster WSF is a premium fertilizer with TMax technology for enhanced foliar and root nutrient uptake. Ideal for use on sports fields and fairways to compliment the main granular fertilizer programme.

Product advantages

1. High Nitrogen content ensures a fast initial effect.
2. Urea Nitrogen component optimizes foliar uptake.
3. Mixed Nitrogen source to optimize plant uptake.
4. Ideal tank mix partner for boosting Nitrogen levels.
5. Potassium content provides balanced growth and stronger turf
6. Chelated Iron content for enhanced colour.

Technology

Poly-S	Pace	TMax	MU ₂	SILK	Pro-Lite

Use

Green	Tee	Fairway	Sports field	Amenity

---	---	---	---	---	---	---	---	---	---	---	---

Performance*

Granule dispersal: immediate
Turf response: < 24 hours
Longevity: 2-4 weeks (depending on rate)
** depending on environmental factors*

Product characteristics

Pack size: 15kg
Foliar Application Rate: 15-30kg/Ha
Water volume: 300-600L/Ha

Drench application rate: 30-60kg/Ha
Water volume: 600-1,000L/Ha

Pack coverage: 2,500-10,000m²

Nutrient levels applied (kg/ha)

15kg/Ha			30kg/Ha

15.8	0.0	6.3	21.0	0.0	8.4

Directions for use

- Sportsmaster WSF products are tank-mixable with other products within the range and H₂Pro & H₂Pro Maximise wetting agents.
- To ensure that this product dissolves completely: all products should be mixed by adding quantity required to a half full spray tank and agitating for 10-15 minutes. Bring to total volume with water. Water temperature will affect dissolution rate.
- Avoid applications during frosty or drought conditions.
- Mix with TurfMark Extra spray pattern indicator to aid spraying, to condition water and minimize spray drift.
- The water volume used to apply Sportsmaster WSF will affect how nutrients are taken up by the plant.
- For foliar applications use low water volumes (300-600L/Ha) and to optimize uptake avoid high temperatures and sunny conditions.
- For root uptake applications use high water volumes (600-1000L/Ha) and follow immediately with a minimum of 2-3 minutes irrigation to provide the necessary water volume and to reduce the risk of turf injury.

Storage

Store in original container. Keep at temperatures above 0°C. Keep away from food, drink and animal feeding stuffs. In crystalline form, enhances combustibility of other substances. Keep from drying out. Protect from contamination.

Health & Safety

A Material Safety Data Sheet is available on request.

Guaranteed Analysis

35%	TOTAL NITROGEN (N) 4.3% nitrate nitrogen (NO ₃ -N) 30.7% urea nitrogen (Ur-N)
14%	POTASSIUM OXIDE (K₂O)
0.13%	Iron total (Fe) chelated by EDTA

Sprayer advice

Spray quality	Size of droplets	Retention on leaf surface	Potential drift hazard*	Foliar application	Root application
Very fine	Fine	Good	High	✓✓	x
Fine	↓	Good	↑	✓	x
Medium		Good		✓	✓
Coarse	↓	Moderate	↑	✓	✓
Very coarse	Coarse	Poor	Very low	x	✓✓

* Spray drift can be minimized by using TurfMark Extra
