

# Landscape Fertilizers

## Enmag® CRF

- \* Controlled release fertilizer for trees and shrubs
- \* Eliminates the need for repeated top dressings
- \* Minimises leaching – even in pure sand

One dressing of Enmag CRF applied over the root area of established plants, or incorporated in the soil in the planting hole during transplanting, will provide a continuous supply of essential nutrients throughout the growing season.

### Pack information

*Pack size:* 25kg bag  
*Pack coverage:* 180-355 sq. m  
*Analysis:* 11+22+9 (12+9.6+7.4) containing 6.0%Mg.  
*Longevity:* 8-9 months

<small>*Do not exceed 120g per sq.m</small>		

## Osmocote® Exact Tablet

- \* World-famous Osmocote Exact in tablet form
- \* For hanging baskets and all container grown plants
- \* Pre-measured tablets of 5g or 7.5g
- \* Feeds continuously for 5-6 months or 8-9 months

Osmocote Exact Tablets use third generation controlled release fertilizer technology giving up to nine months of continuous feeding. The 15+9+9 is perfectly balanced for all types of container grown plants, while magnesium and trace elements help establishment and season-long flowering.

Accuracy of dose is guaranteed, so over-fertilization is eliminated, labour and application rate errors reduced.
