

# FUSION GRANULAR

Fusion Granular is a fine turf granule containing elements suitable for sports turf. These essential nutrients are combined in a naturally derived sucrate complex which, in the presence of moisture, allows the granule to quickly disperse and the nutrients made available to the plant. Fusion Granular will not stain.

### Directions for Use:

Fusion Granular can be applied at 100 - 200 kg per hectare (10 - 20 g per m<sup>2</sup>) depending on longevity required. Irrigation or rainfall after application will ensure rapid dispersal and availability of nutrients

To be used only where there is a recognised need. Do not exceed the appropriate dose rate.

Active Content by weight		(w/w)	
Magnesium (MgO) .....	5.0%	Manganese (Mn) .....	8.0%
Copper (Cu) .....	0.45%	Zinc (Zn) .....	1.5%
Iron (Fe) .....	20.0%	Boron(B) .....	0.45%
