

Upstream

Black

Lake Colourant

Upstream Black Lake Colourant is a concentrated easy to use aquatic colourant in an easy to use liquid formulation. The natural black dye help to darken the water reducing sunlight and slowing down the growth of aquatic weeds and algae. The dye will also help mask discoloration from suspended clay particles resulting in a natural looking water feature. Once applied, Upstream Black Lake Colourant rapidly disperses from the surface downwards giving a natural looking water feature in minutes.

Directions for Use:

1 litre of Upstream Black will treat 2000 m³ of water.

Precautions:

Use in accordance with COSHH assessment when handling or using chemicals. WASH HANDS after use. STORE IN ORIGINAL CONTAINER KEEP OUT of reach of children.
