

Nomix **DUAL**

The responsible way to spray
with Total Droplet Control

Why should I use Nomix Dual?

Fast-acting, long-lasting control of annual and perennial grasses, as well as broad-leaved weeds

- the only residual approved for use on both hard and soft surfaces

Efficient and cost effective

- one residual application per year reduces labour costs

Versatile

- use in amenity and industrial situations, including pavements, around street furniture, shrub beds, tree bases, gravelled areas and parks

Safe for bystanders, residents and pets

- targeted application, low volume formulation and no breathable droplets

Safe for operators

- non-irritant formulation and ready to use pack reduce the risk of operator exposure and errors

Hard Surfaces

Nomix Dual is ideal for use on hard surfaces, as it can be easily targeted to visible weeds. It can also allow operators to target areas of potential weed growth, such as gaps between paving stones, along the pavement back edge or kerb edge and along fence lines.

Soft Surfaces

Use Nomix Dual on any natural surface that is not intended to bear vegetation, on permeable surfaces overlying soil and around amenity vegetation, including shrub beds, tree bases and gravelled areas.

Industrial areas

Shrub beds

Hard surfaces

Off-track rail

Gravelled areas

How does Nomix Dual work?

The active ingredients in Nomix Dual are Glyphosate and Sulfosulfuron. Glyphosate is a contact herbicide, absorbed by the leaves and stems of the weed and translocated to other parts of the plant, including the roots and rhizomes. Sulfosulfuron is the residual active ingredient. It is both foliar and soil acting, delivering long-lasting control.

Nomix Dual is highly effective. The low volume formulation uses unique emulsion technology, ensuring it sticks to the leaf and is absorbed easily.

How do I apply Nomix Dual?

Nomix Dual is a pre-mixed herbicide for use with the Nomix range of Total Droplet Control (TDC) low volume applicators.

Nomix Dual is quick and easy to apply. The ready to use herbicide pack connects directly to the applicator, without any need for mixing or measuring. Simply shake the pack, connect it to the applicator, calibrate and you are ready to start spraying.

Droplet sticks to the leaf

Droplet spreads

Residual herbicide penetrates

Nomix Dual is applied at a rate of 9 litres per hectare.
