

A Convenient System for Supplementing Your Turf Management Program

- Makes touching up problem spots easy
- Turf safety in any weather
- 76% active ingredient
- Allows supplemental wetting agent treatment with no extra labor costs
- Gives temporary relief of localized dry spots and wet spots
- Moves water and chemicals uniformly into the rootzone

- Control Valve made of Brass for long life and designed with extra large ball valve orifice, delivering over 40 gpm at 80 psi.
- Precision Spray Nozzle designed to put down large volume of water with precise/ large droplet-distribution pattern. Applies Aquatrols Soil Surfactant evenly and quickly.

- Applicator in-line component and bowl are designed to rotate the Aquatrols Soil Surfactant tablet at 1 RPS (rotation per second) for even distribution of tablet.

- After applying Aquatrols Soil Surfactant the applicator can be transformed into a 2-in-1 product. By unscrewing the Precision nozzle and Hi-Flow control valve and connecting these two components together, you have syringe nozzle for watering greens, tees and other applications.

- Brass fitting ensures higher structural

Maximum pressure is 90 p.s.i. Pressures higher than this may result in damage to the applicator.

- A – Top
- B – Bowl
- C – Gasket
- D – Precision Spray Nozzle
- E – High Flow Control Valve (1" hose thread connection)
