

# Heritage

AI. 500g/kg azoxystrobin  
MAPP No. 13536 PCS No. 02092

**AREAS OF USE:**  
✓ AMENITY TURF  
✓ AMENITY GRASSLAND

**LABEL APPROVED DISEASES:**  
✓ MICRODOCHUM PATCH  
✓ ANTHRACNOSE  
✓ BROWN PATCH  
✓ LEAF SPOT / MELTING OUT  
✓ RUSTS  
✓ TAKE ALL PATCH  
✓ TYPE 2 FAIRY RING

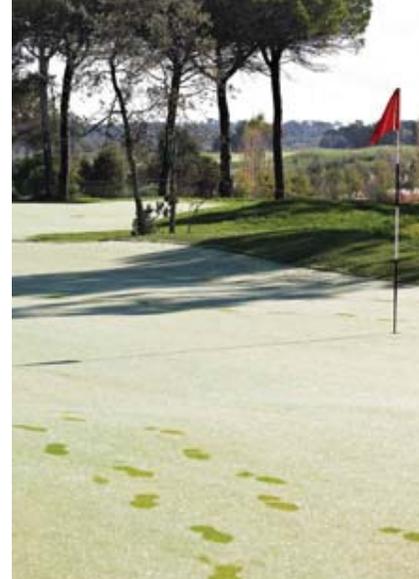

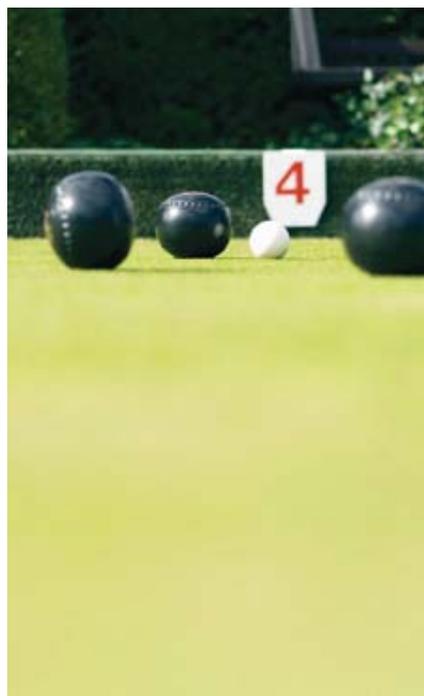

## Systemic fungicide derived from naturally occurring compounds.

Heritage is a high performance systemic strobilurin fungicide. The small pack granular formulation makes it ideal for use on bowling greens.

### Heritage BENEFITS

- Seven turf diseases on the label
- Derived from naturally occurring compounds
- The only strobilurin that can be used up to 4 times per annum

### Directions For Use

- For best results use as protectant or during early stages of disease establishment or when a predictive assessment indicates a risk of disease development, go to [www.greencast.co.uk](http://www.greencast.co.uk).
- Apply preventatively and as a drench (1,000 litres of water) for control of Take-All patch disease and make 2 applications 14 days apart.
- Avoid applications during frosty or drought conditions.
- Heritage is tank-mixable with other products within the Everris range Advice should always be sought via your Everris Technical Representative before any tank mix is applied.
- Mix with TurfMark Extra spray pattern indicator to aid spraying, to condition water and minimise spray drift.
- FOR USE ONLY AS A HORTICULTURAL FUNGICIDE.

Tank Mix Table (figures in brackets represent the tank mix water rate in litres per hectare)

GREENMASTER LIQUID							SPORTSMASTER WSF				BIOSTIMULANTS
High N	Spring & Summer	NK	High K	STEP Liquid	Effect Iron Fe	Ca-Booster	High N	High P	High K	Sierrasol Iron	Vitalnova Blade
