

# Sportsmaster<sup>®</sup> WSF

**RECOMMENDED USAGE:**  
 ✓ GREENS  
 ✓ TEES  
 ✓ FAIRWAYS  
 ✓ SPORTS FIELDS  
 ✓ AMENITY

**Nitrogen content**

High performance ultra soluble fertilizers for cost effective treatment of large turf areas.

The WSF Range of soluble fertilizers contains TMax to enhance nutrient uptake. The foliar and root uptake gives a rapid response that is then sustained for a number of weeks. The wide range of analyses are designed for use throughout the year. The WSF range provides excellent value for the treatment of large areas, especially golf fairways. Compatible within the Everris range and tank mixes with Primo Maxx.

## The complete Sportsmaster WSF range

PRODUCT NAME OXIDE ANALYSIS (ELEMENTAL ANALYSIS)	TECH	PRODUCT NOTES	NUTRIENT BREAKDOWN					NUTRIENT BREAKDOWN							BAG SIZES (kg)	APPLI CATION RATE (kg/ha)	WATER VOLUME (L/ha)	NUTRIENT LEVELS APPLIED (kg/ha)			BAG COVERAGE (m <sup>2</sup> ) per 15kg bag	RECOMMENDED PERIOD OF USE												
			TOTAL N	NITROGEN				TOTAL P	TOTAL K	B	Cu	Fe	MN	Mo				Zn	N	P		K	J	F	M	A	M	J	J	A	S	O	N	D
				N-NO <sub>3</sub>	N-NH <sub>4</sub>	N-Urea	N-MU <sub>2</sub>																											
<b>HIGH N</b> 35-0-14 +0.13Fe (35-0-11.6 +0.13Fe)	TMax	Nitrogen boost with Potassium content providing balanced growth and stronger turf.	35	4.3		30.7	0	14			0.13				15	15 30	300-600 (Foliar)	5.3	0	2.1	10,000	J	F	M	A	M	J	J	A	S	O	N	D	
																		10.5	0	4.2	5,000													
																		45 60	600-1,000 (Root)	15.8 21.0	0 0													6.3 8.4
<b>HIGH P</b> 16-32-16 +0.15Zn (16-14-13.3 +0.15Zn)	TMax	The high P to NK ratio encourages strong root growth and seed establishment.	16	4.8	6.2	5	32	16						0.015	15	15 30	300-600 (Foliar)	2.4	4.8	2.4	10,000	J	F	M	A	M	J	J	A	S	O	N	D	
																		4.8	9.6	4.8	5,000

																		45 60	600-1,000 (Root)	6.8 9.0	0 0													19.4 25.8
<b>SIERRASOL IRON</b> 20%Fe	TMax	Produces a dark green sward and promotes disease tolerance.									20			15	10	900				15,000	J	F	M	A	M	J	J	A	S	O	N	D		
															15	(Foliar & Root)				10,000														
															20					7,500														

## Sportsmaster WSF BENEFITS

- Cost effective fertilizer treatment for large areas of turf
- TMax enhances nutrient uptake
- Low scorch risk

## Directions For Use

- Sportsmaster WSF products are tank-mixable with other products within the range and H<sub>2</sub>O Pro Conserve and H<sub>2</sub>O Pro Maximise wetting agents.
- To ensure that this product dissolves completely: all products should be mixed by adding quantity required to a half full spray tank and agitating for 10-15 minutes. Bring to total volume with water. Water temperature will affect dissolution rate.
- Avoid applications during frosty or drought conditions.
- The water volume used to apply Sportsmaster WSF will affect how nutrients are taken up by the plant:
  - For foliar applications use low water volumes (300-600l/ha) and to optimize uptake avoid high temperatures and sunny conditions.
  - For root uptake applications use high water volumes (600-1,000l/ha) and follow immediately with a minimum of 2-3 minutes irrigation to provide the necessary water volume and to reduce the risk of turf injury.

## Sprayer Advice

Spray Quality	Size of droplets	Retention on leaf surface	Potential drift hazard*	Foliar applications	Root applications
Very Fine	Fine	Good	High	✓✓	x
Fine		Good		✓	x
Medium		Good		✓	✓
Coarse		Moderate		✓	✓
Very Coarse	Coarse	Poor	Very Low	x	✓✓

\* Spray drift can be minimised by using TurfMark Extra.

- Compatible with Primo Maxx to make ideal for use as part of an iTurf programme
- Maintain turf health with the appropriate use of fertilizer
- Mix with TurfMark Extra spray pattern indicator to aid spraying, to condition water and minimize spray drift

## Performance\*

Granule dispersal: immediate  
 Turf response: < 24 hours  
 Longevity: 2-4 weeks (depending on rate)

\* depending on environmental factors
