## Grazers application information

### Grazers

***Effective against damage from Rabbits, deer, pigeons, geese***

Contains Calcium and other ingredients

Basic application rate:	250ml in 250l water
Knapsack rate:	20ml in 20l water
In areas of persistent damage a double rate may be applied	
Double application rate:	500ml in 250l water
Knapsack rate:	40ml in 20l water

Application timing: Apply on foliage at any stage of growth during the growing season, as soon as damage has occurred, or to areas potentially at risk. Rainfast in 1 hour. Grazers can remain effective for up to 6 weeks, but in certain situations where crops are grazed, mowed, irrigated or exposed to prolonged heavy rainfall after spraying, repeat applications may be required sooner. Growers of nursery stock please refer to the website for further guidelines/information.

***Note to growers of horticultural crops: New plants are especially vulnerable to damage. Spray them at least twice (3 days apart) prior to planting, then spray again once planted.***

Repeat applications: Leave at least 3 days – before or after – any other spray applications before repeating.

Precautions: Avoid contact with skin and eyes. Ingestion may cause vomiting. If irritation or symptoms persist seek medical advice.

**Do not mix with any other agricultural chemical product**
