

Water Management Product

Primer Choice

Stock Code	1 Litre 10 Litre 210 Litre	UK 06191 UK 06192 UK 06194
What is it	Primer Choice is a soil surfactant, which offers the non-programme uses flexible treat of a localised dry patch damaged turf. Primer Choice has been specifically formulated for 1 off treatment, rapid recovery of localised dry patch, for greens, tees and fairways.	
Typical Physical Properties @ 20 ° C	Density Appearance	1.04 – 1.05 g/cm ³ Water White
What ingredients are used in the formulation	A proprietary blend of Non Ionic Polyol Surfactants	
For Use On	For fine turf when the end user needs a flexible soil surfactant that can be used when symptoms of dry patch, wet patch and are prevelant. Can be used as a 1 off treatment for greens, tees and fairways.	
Recommend Dilution Rates	<ul style="list-style-type: none">• Application Rate once a week until the problem is cured• 1 off usage• Irrigation system• Dilute and shoot	250 ml in 5 litres of water per 100m ² Minimum 150 ml in 5 litres of water per 100m ² Maximum 250 ml in 5 litres of water per 100m ² 12.5 litres per hectare 1 litre per 500 m ²
Time of the year to apply	All year round depending on the type of turf problem	Needs no watering in after application. Although it is advisable to syringe the applied areas before moving. If that is not possible then leave the moving baskets off until natural rainfall occurs. Always ensure that the product is thoroughly mixed prior to application. Do not tank mix with agrochemical products.
Recommend for use with	All turf tractor mounted sprayer equipment and pedestrian spray equipment. 1 Litre bottles for use with a Dilute & Shoot Applicators.	
How does the Product Work	It is well known that highly cultivated turf can produce a situation where the grass becomes water repellent under certain drought/heat stress conditions. The symptoms will eventually manifest themselves as localise dry spots. Primer Choice a fast acting rapid flexible product to overcome the formation of localised dry spots both on greens, tees, fairways. Primer Choice can also be used on wet areas to enhance the movement of water through the soil profile.	
The product is manufactured in the UK under licence from the Aquatrols Corporation of America
