

*Establish and renovate golf greens, bowling greens and prestige lawns.*

A classic blend that includes the three main species used in greens throughout the UK; Chewings fescue, slender creeping red fescue and common bent. Tolerant of close mowing down to a height of 5mm, this mixture forms a smooth and tightly knit turf. An economical option for golf and bowling greens without compromising on quality – containing varieties which are tested by the STRI for use in greens.

- + Affordable option for overseeding or establishing golf and bowling greens
- + Traditional blend of bent and fescue grasses – widely used on greens throughout the UK
- + Tolerant of close mowing down to 5mm
- + Uses varieties tested by the Sports Turf Research Institute
- + When mown short, forms an exceptionally tight, dense surface

**Areas of use:**

- + Golf greens
- + Golf green surrounds
- + Bowling greens
- + Prestige lawns
