LAWN MAINTENANCE PROGRAMME

Feb

Apply **Prestige No.1 Lawnsand** @ 70g/m². This Nitrogen and Iron fertiliser helps to control moss and acts as a spring, start up tonic fertiliser. Apply on a dry day. 24 - 48 hours of dry weather required after application, then irrigate.

Mar

7-14 days after the above scarify the lawn in 2-3 directions and remove debris.

Apr

Apply **Prestige Fine Turf Traditional 12:0:9** @ 35g/m². This is a spring/summer fertiliser with Nitrogen and Potash. This fertiliser will feed for approximately 6 weeks. Irrigate after application.

Apply **Barenbrug Sport Extreme** Grass Seed @ 25g/m² to lawn to help get good grass coverage. Sport Extreme will give you good hard wearing lawn with quick recovery. Keep seed/soil moist to aid germination.

Jun

Must not be applied within 8 weeks of seeding as it will kill young grass

-

Do not spray with 1 metre of your pond/stream as these products are toxic to aquatic organisms

Jul

Apply **Prestige Fine Turf Longevity 14:2:6**, slow release fertiliser at 35g/m². This Nitrogen, phosphate and potash fertiliser is slow release and will feed for approximately 8 weeks. Irrigate after application.

Sept

Ideally lightly scarify and over seed and weak or bare areas.

Apply **Prestige Fine Turf All Season 6:6:12** fertiliser @ 35g/m². An excellent autumn winter fertiliser. This product can be applied every 6-8 weeks during the winter if required and subject to weather conditions allowing. Irrigate after application.

-**Oct**

Apply **Weedol Lawn Weed Killer** or (for professional users only) **Barclay Holster XL** Selective Weed Killer if needed (Always read the label - use pesticides safely.)

Notes

Aeration during the winter months will aid drainage and root growth. As with all of our recommendations the application dates are approx. and as such are subject to the weather conditions that prevail at the time.
