

Product Information

H₂Pro[®]

Tablet applicator

Brand description

The H₂Pro tablet applicator has a high-flow composite/stainless steel valve and a Precision™ Cloudburst™ nozzle to produce the finest wetting agent gun available. The H₂Pro Tablet applicator is designed to provide powerful, yet ultra-soft spray when watering or applying surfactants to tight, hydrophobic soils.

Product advantages

1. The advanced nozzle gets the job done faster!
2. Ultra Heavy-Duty -brass fittings, aircraft aluminium, stainless steel, and precision engineered glass-filled materials
3. Patented Precision™ Cloudburst™ nozzle delivers large droplets in an outstanding fan pattern
4. Pellet rotation (1 RPS) evenly dissolves/applies wetting agent tablet

Directions for use

- Use for spot treating hydrophobic areas in combination with full wetting agent programme.
- Watering-in after application will aid penetration of wetting agent into the soil and improve efficacy.
- Penetration of the wetting agent will be further enhanced if applied following aeration programmes such as hollow tining, slitting and/or scarification.
- Remove the H₂Pro applicator bowl and you have a superb syringe nozzle combo: the patented, 48 GPM Precision™ Cloudburst™ with our high-flow, oversized handle valve.
- Heavy-duty, transparent plastic shows fluids. (No more cracked bowls during winter storage!)

Spreader Settings

Applicator	Product	Spray time (minutes)*	Area treated (m ²)*
H ₂ Pro Tablet applicator Gun	1x 250g Tablet	5-10	500

*Dependent on water temperature and pressure
