E16 - Embankment & Ground Cover

Steep embankment grass cover

- Designed to give rapid, yet long lasting ground cover on steep embankments and areas of unstable or loose soil
- Utilises deep-rooted and creeping species to stabilise and bind soil

The mixture will give rapid germination due to the inclusion of annual ryegrass which will act as a 'nurse crop', giving protection to the other species whilst they establish.

- Formulated to be our best performing mixture for establishing steep banks
- Rapid germination from 'nurse crop' annual ryegrass
- Creeping and deep-rooted grasses for soil stabilisation
- Very tolerant of harsh conditions
- Available with white clover for impoverished soils - see E16-C Embankment and Ground Cover

AREAS OF USE

- Steep banks
- Areas of loose and unstable soils
- Road verges

* A higher sowing rate is recommended when sowing on steep slopes.

Specifications

Sowing rate	25 - 50g/m ² *
Height of cut	Down to 50mm
Pack size	20kg

Composition

- 25% Perennial Ryegrass Dwarf
- 20% Strong Creeping Red Fescue
- 15% Slender Creeping Red Fescue
- 15% Tall Fescue
- 10% Smooth Stalked Meadow Grass
- 10% Hard Fescue
- 5% Browntop Bent
