

Prestige Rose Food is suitable fertiliser for all rose types, it contains all the essential nutrients and trace elements for healthy rose plants and promoting abundant blooms. Extra magnesium is also included in the feed to encourage richer, greener leaves.

- 1** Application should be 35-70g/m².
- 2** Compound Granular.
- 3** Apply when roses are growing (March to October) or prior to bare root planting as a base feed.
- 4** If no rainfall within 24 hours then product will need to be irrigated in.
Nitrogen source:
5% Ammoniacal
