

Pro Flora 15 - Pollinator

Black Knapweed
(*Centaurea nigra*)

With increased pressure upon habitats for pollinating insects, **Pro Flora 15** brings together a mix of species specifically to attract pollinators. This mix of native origin wild flowers and fine leaved non-competitive grasses will thrive on a wide range of soils with a prolonged flowering period, perfect for bees, butterflies and other pollinators. This mixture will also benefit other predators higher up the food chain.

Colour palette:

20% Wild Flowers

- 4.5% **Birdsfoot Trefoil**
(*Lotus corniculatus*)
- 15% **Black Knapweed**
