

# Heptasol 19.5% Soluble Iron

PRESTIGE Iron Hardener  
Super Turf Solutions

KNOW YOUR  
PRESTIGE

A fast acting soluble iron (19.5%) for the greening and toughening of sports turf. Due to the sulphur content (12.5%) regular applications can help to acidify soil at the surface, which will also help reduce worm activity.

- 1 Application should be 25kg/ha.
- 2 Apply in a water volume of 700 - 1,000 ltr/ha.
- 3 Do not apply in frosty conditions.
- 4 Do not apply in high temperatures or drought conditions.
- 5 This product may leave footprints and wheel marks on the surface following spraying. This is only temporary and these will grow out.
- 6 Heptasol can stain non turf surfaces and clothing, please take care.
- 7 Always clean the sprayer after use with Prestige Super Tank Cleaner.
- 8 The high level of sulphur can cause wear to nozzles, ensure nozzles are checked and replaced regularly.
