50 litres per hectare proven to work for 90 days!

Fifty 90 gives you proven guaranteed safe protection against water repellency problems for ninety days! Fifty 90 won't "break" under climatic stress or drought conditions like traditional long-term products. It is proven to remain in the soil for three months, reducing water repellency (the cause of localised dry spots) and promotes turf uniformity.

- ✓ **Proven to remain in the soil for a minimum of 90 days**
- ✓ **Dramatic effect on water repellent soils**
- ✓ **Improves turf quality while combating the effects of soil water repellency**
- ✓ **Less applications needed**
 - ✓ **Greater Safety**
 - ✓ **Economical**
- ✓ **Dilution rate: 1 ltr:40 ltrs water**
- ✓ **Application rate: 50 ltrs/ha**
