

An effective liquid carbon based treatment for dealing with oil spillage.

- 1** Application should be 5Ltr diluted in the 25Ltr of water to cover approximately 250m2.
- 2** It is essential that oil spillages are treated as soon as they occur as this will provide optimum results.
- 3** First remove as much oil as possible with absorbent paper then apply product.
- 4** Leave Super Liquid Carbon in place for 12-18 hours for optimum results.
- 5** This treatment can be repeated if necessary.

Prestige Super Liquid Carbon

Prepare for the cutting season and
YOUR WORST NIGHTMARE...

Picture the scene. You've just finished your early morning cut of the greens, you turn around to admire your handiwork and **DISASTER!**
Oil tracks all over the place!

What do you do?

Call in the Carbon!

Prestige Super Liquid Carbon

Spraying Aid

An effective liquid carbon based treatment for dealing with oil spillages. It is essential that oil spillages are treated as soon as they occur as this will provide optimum results. First remove as much oil as possible with absorbent paper then apply product.

Note: Due to the heat of hydraulic oil, damage to the affected turf will take place. After application of Liquid Carbon (as per label recommendations), overseeding will be required.
