

Product Information

Vitalnova[®]

Product description

Vitalnova is a liquid soil micro flora activator for advanced turf grass nutrition. Its compounds are a balanced complement of macro and micro nutrients, simple sugars supplying carbohydrates and seaweed extract.

Product advantages

1. Directly increases carbohydrate levels within grass plant.
2. Increases mycorrhizal numbers and enhances nutrient uptake.
3. Increases soil bacterial populations and soil nutrient cycling is enhanced.
4. Improved rooting structure.
5. Faster seed emergence and establishment.
6. Previously locked-up nutrients in the soil are released to enhance color and turf health.
7. Trace element package to enhance turf health and aid recovery from stresses.

---	---	---	---	---	---	---	---	---	---	---	---

Performance*

Product dispersal: immediate
 Turf response: < 24 hours
 Longevity: 3-6 weeks (depending on rate)
 * depending on environmental factors

Product characteristics

Pack size (L) : 10 & 200 L
 Application Rate (initial): 50 L/Ha (5L/1000m²)
 Application Rate (follow-up): 25 L/Ha (2.5/1000m²)
 Water volume: 200 L/Ha (minimum) (20 L/1000m²)
 Pack coverage (10L): 2000-4000 m²
 Pack coverage (200L): 40000-80000 m²
 Specific Gravity (Kg/L): 1.27
 Item code: 3120

Nutrient levels applied (L/ha)

25 L/ha			45 L/ha			50 L/ha

1.6	2.1	1.1	2.8	3.7	2.0	3.2	4.1	2.2

Directions for use

- The product should be applied in good growing conditions and when the soil temperature is above 10°C for the first application.
- Apply first treatment at 50L/ha then follow up with 25L/ha at 5-6 week intervals.
- Avoid applications if turf is under stress such as during frosty or drought conditions.
- Avoid application late in season when turf is going into winter dormancy or when growth is significantly slowed.
- Mix the can well before use.
- Approximately half fill the spray tank with water and add required amount of Vitalnova and agitate thoroughly adding the remaining water.
- The product should be well watered-in after application.
- Can be tank mixed with Greenmaster Liquid fertilizers (with exception of Ca-Booster) and H₂Pro wetting agent range.
- Mix with TurfMark Extra spray pattern indicator to aid spraying, to condition water and minimize spray drift.

Storage

Keep at temperatures below 30°C. Store in original container. Keep containers tightly closed in a dry, cool and well-ventilated place. Keep away from direct sunlight.

Health and safety

A Material Safety Data Sheet is available on request.
