Super Turf Solutions

HEPTASOL SOLUBLE IRON

Iron and sulphur for the rapid greening and toughening of sports turf.

Ferrous Sulphate Heptahydrate

Analysis (w/w):

18.7% Fe

11.2% S

Treats 5,000 m²

Contains: 12.5 Kg

DIRECTIONS FOR USE:

HEPTA-SOL is a fast-acting soluble iron for the greening and toughening of sports turf. Due to the sulphur content, (11.5% approx), regular applications can help to acidify soil.

TIMING:

HEPTA-SOL can be applied in spring, summer and autumn, when the surface is moist, (but when no rain is expected)

MIXING PROCEDURE:

Half-fill the spray tank with water. Pre-mix the correct amount of **HEPTA-SOL** with a suitable volume of water. Add the mixed solution to the spray tank and agitate. Finally add the remaining quantity of water and agitate thoroughly. (Agitating is not required on sprayers fitted with suitable agitating facilities).

APPLICATION:

Apply as a medium / coarse spray (as defined by BCPC) to sprayers fitted with a suitable flat fan nozzle at the rates below.

1.25 kgs of **HEPTA-SOL** in
35-50 litres of water, per 500 m².

To be used **ONLY** where there is a recognised need.
DO NOT exceed recommended application rate.

FERROUS SULPHATE (FeSO⁴)
(Contains: Iron sulphate E.C. 231-753-5)

WARNING

**Harmful if swallowed.
Causes skin irritation
Causes serious eye irritation.**

*Wear protective gloves/eye protection.
IF SWALLOWED: Call a POISON Center or doctor/physician if you feel unwell.
IF ON SKIN: Wash with plenty of soap and water.
IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
If eye irritation persists: Get medical advice/attention.
Take off contaminated clothing and wash before reuse.*
