

Super Hose End + Seaweed Pellets

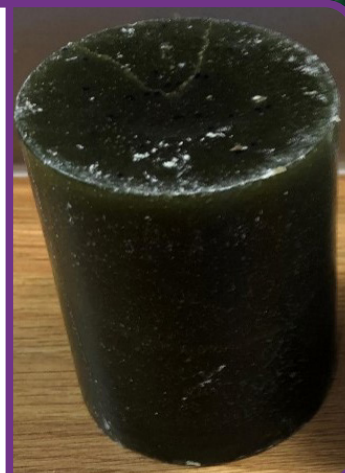

Prestige Super Hose End + Seaweed pellets are formulated using the latest surfactant technology, for all pressure water systems for improved performance when hand watering. Contains seaweed to aid recovery of drought stressed turf.

Super Hose End + Seaweed Pellets are the latest generation of the hose end wetting agent tablet. They are designed to be used through the standard hosepipe applicator gun.

Super Hose End + Seaweed pellets are used in conjunction with Prestige Super Replenish Liquid wetting agent to spot treat areas of dry patch. A concentrated seaweed extract has been incorporated into the tablet to enhance recovery of the turf and stimulate root growth.

Features and Benefits

- Superior control of dry patch and enhance recovery of damaged drought stressed turf.
- Uniformly treats 100% of the rootzone and soil particles.
- Improves the water holding capacity of all types of rootzones.
- Tablet dissolves evenly throughout the tank for consistent application.
- Mild cleaning effect on the irrigation system.
- Specially formulated for all water systems.
- Reduces summer stress and wilt.

Application Rates

Place Hose End Pellet into the chamber of a Hose End Applicator Gun and turn on water supply. The pellet is designed to dissolve slowly at a pressure range between 4 - 6 bar.

Overall Treatment

Apply one Prestige Super Hose End + Seaweed Pellets per golf green

Spot Treatment

Apply one Prestige Super Hose End + Seaweed Pellets to a surface area of 1,500 - 3,000m²

Coverage is given as a guide as the solubility of pellets are affected by water temperature, pressure, and flow rates.
