

Stay Wet

Water absorbent crystals

Retains and releases moisture

Ideal for hanging baskets
and planters

Vitax Stay Wet Crystals can rapidly absorb hundreds of times their own volume of water and act as a reservoir for plant roots growing in treated media. Its rapid action ensures minimum water loss during watering and re-watering, making it ideal for use in hanging baskets, planters, tubs and containers susceptible to drought stress.

HOW TO USE

Hanging Baskets, Tubs and Containers

Mix evenly into compost media using a trowel or by hand and water well after planting, seed sowing etc. For best results fill the basket or container $\frac{3}{4}$ full with compost and mix in the appropriate quantity of Stay Wet. Fill the rest of the container with standard compost.

Application Rates:

Type of Container	Container Size	Teaspoons
Pots, tubs and baskets	30-40 cm (12-16 inch)	1 $\frac{1}{4}$ - 2 $\frac{1}{2}$
Window Boxes	Per 30cm (12 in) run	1 $\frac{1}{4}$
Compost	Per 10 litres	1 $\frac{1}{4}$

Pre-Planted Baskets, Tubs and Containers

Make several holes in the surface of the container around the plants and fill the holes with Stay Wet. Use $\frac{1}{4}$ to $\frac{1}{2}$ teaspoon per hole.

New Plantings

Use 10 g (2 $\frac{1}{2}$ teaspoons) worked into 10 litres of soil or compost and re-fill the hole surrounding the rootball.

General Precautions

Wear gloves when handling compost • Store away from children and pets • May be harmful if swallowed • Keep container tightly closed in a dry place • Do not breathe dust • Sweep up spillages which become slippery when wet.
