

E10

Clay/Waterlogged Soils

Flood prone areas and waterlogged soils

Formulated for areas that are prone to periods of short-term flooding and seasonal waterlogging.

- Ideal for Sustainable Drainage Systems (SuDS)
- Tolerant of extended periods of waterlogging
- Deep-rooting to stabilise soil
- Suitable for areas that are dry through summer and wet through winter
- Able to recover from short periods of flooding

In the bag

- 40% Tall fescue
- 40% Perennial ryegrass
- 20% Strong creeping red fescue

Sowing rate: 30-40g per m²
Height of cut: Down to 25mm
Pack sizes: 20kg
