

A selective weedkiller for control of many common broad-leaved weeds in lawns

INSTRUCTIONS FOR USE

When to use: Vitax LawnClear 2 kills many common broad-leaved weeds including broad-leaved (greater) plantain, ribwort plantain, creeping buttercup, white clover, common dandelion and daisy.

One application a year may be made between April and October when the soil is moist and weeds are leafy and actively growing.

Do not apply in windy weather. Take extreme care to avoid drift onto crops and non-target plants (e.g. trees, shrubs and bedding) outside the target area. Keep spray off cultivated plants and away from ponds and watercourses.

Where to use: A unique formulation for use on lawns, Vitax LawnClear 2 kills weeds present at the time of treatment, but does not prevent weeds from germinating. A second application, of another product, may be required after 6-8 weeks to kill stubborn weeds like buttercup and any weeds that may have germinated later. Test for turf safety on a small area of turf before overall application.

Do not mow for 3 days before and 3 days after treatment to allow full uptake and movement within the weeds. Do not spray on lawns which are less than one year old.

Allow at least six weeks between treatment and overseeding established turf.

Do not treat during drought, freezing conditions or in periods of prolonged cold weather.

If land treated with Vitax LawnClear 2 is subsequently sown or planted with broad-leaved plants, an interval of at least six months should be allowed after application.

How to use: Apply using a watering can fitted with a fine rose or sprinkler bar, or by sprayer. To treat 12 m², use 20 ml in 6 litres of water when using a watering can, or 20 ml in 600 ml water when applying by sprayer.

Hold the bottle upright, loosen cap and gently squeeze the bottle to fill the dose chamber to the required level. Remove cap and empty contents into water in the watering can or sprayer mixing thoroughly. Repeat as required.

When applying by sprayer set the nozzle to a medium setting. Avoid too fine a spray as drift onto neighbouring plants may occur.

After use immediately wash out equipment with water and detergent to remove all traces of weedkiller. After cleaning fill with clean water and leave overnight. Spray or drain out again before storing or using another product.

After treatment, leave the clippings from the first mowing on the lawn. The next three mowings should be composted well, for at least 9 months, before being used as a mulch. Do not dispose of the grass clippings via council composting schemes.

SAFETY INSTRUCTIONS

Protection during/in use

WASH HANDS AND EXPOSED SKIN AFTER USE

Environmental Protection

Direct away from ponds and other surface water bodies.

Do not empty into drains.

Storage and Disposal

KEEP OUT OF REACH OF CHILDREN AND PETS

KEEP PRODUCT IN ORIGINAL CONTAINER, tightly closed in a safe place

UK only: Dispose of empty container in the dustbin. Dispose of unused product in its container at a household waste site (civic amenity site). Contact your local council (local authority) for details.

Ireland only: To triple rinse empty container – remove cap and with blunt instrument push plug/ball into container to triple rinse in normal fashion.

PROTECT FROM FROST
