

A traditional moss control powdered fertiliser and tonic giving early Spring growth and great moss control. No.1 Lawnsand contains 7% Fe which helps to hit the moss really hard.

- 1** Application should be 70-105g per m2.
- 2** Nutrient inputs at 70g/m2:  
32.2 kg/ha Nitrogen  
0 kg/ha Phosphorus  
0 kg/ha Potassium
- 3** Powder.
- 4** If no rainfall within 24 hours then product will need to be irrigated in.
- 5** This product may leave footprints until thoroughly watered in and can stain non turf surfaces.
- 6** Suggested spreader settings:  
Accupro = Cone 8, Gate opening J applied in TWO directions gives a total of 70g/m2.  
Ev-N-Spred = Gate opening 20 applied in TWO directions gives a total of 70g/m2.  
(Fertilisers applied in two directions give a far more uniformed coverage).  
To achieve 105g/m2 apply in three directions.
- 7** Nitrogen source:  
4.6% Ammoniacal nitrogen
