

# ULTRAFINE 60

## Golf greens, tees, fairways, bowling greens, cricket outfields, tennis

- Designed for the construction or overseeding of medium-fine and fine turf with high wear pressure
- 60% ultrafine perennial ryegrass combined with 40% fine red fescues
- Barolympic is the stand-out cultivar ryegrass for summer sports use
- Barpersie offers new and improved performance

### MIXTURE:

60% Perennial ryegrass  
40% Fine red fescues

### USAGE:

Designed for the construction or overseeding of medium-fine and fine turf under high wear pressure.

### FEATURES & BENEFITS:

*Barpersie* is a new cultivar to **Ultrafine** products for 2024, with an enticing combination of wear tolerance, shoot density, visual merit and leaf fineness. As a new cultivar in Table L1 of Turfgrass Seed (still undertaking its second trial), it scores of 9.0 for visual merit and shoot density are provisionally table-topping.

*Barolympic* is the market-leading cultivar ryegrass for summer sports use. It is ranked with a score of 8.6 in Table G4 of Turfgrass Seed 2024, the highest mean score in the entire publication, and comfortably above the next best variety in this close-mown test.

*Barprimum* is a recent cultivar from Barenbrug's breeding station in France. It forms a large part of the Sustainable Grass Technology (SGT) concept due to its independently proven drought tolerance, Nitrogen-use efficiency and disease resistance.

The remainder of the product is made up of highly ranked varieties of slender creeping red fescue, *Viktorka* and *Barpearl*. The fescue content in this mixture combines with the ryegrass to create a turf with exceptional density and high disease tolerance.
