

# Gronamic<sup>®</sup> Golf

6-2-4

New  
product

## Organic based fertiliser with unique, proven and sustainable ingredients

6-2-4  
(6-0.87-3.3)

Gronamic Golf 6-2-4 is designed to deliver a healthy natural turf response. It combines a unique blend of mineral and plant-based organic nutrition with a proven biostimulant. Formulated as a mini granule to be applied to the finest turf.

## Key points

- > Organo-mineral fertiliser
- > The organic content is 100% plant based
- > Contains SMX seaweed extract - a sustainably sourced seaweed concentrate
- > Contains Struvite - recycled phosphate
- > Contains Polyhalite - a natural mineral source of K, Ca and Mg
- > Phased nitrogen release

## Recommended period of use

J F M A M J J A S O N D

## Application information

Application rate: | 25 - 35 g/m<sup>2</sup>

## Product characteristics

Formulation type:	Mini-granule
Technology:	Organo-mineral
Granule size	1 mm - 2.5 mm
Pack size:	20 kg
Pack coverage:	571 - 800 m <sup>2</sup>
Longevity:	6 - 8 weeks
Typical turf response:	3 - 7 days depending on environmental factors
Granule dispersal:	Less than 4 days

## Areas of use

- ✔ Greens
  - ✔ Greens surrounds
  - ✔ Greens collars & approaches
  - ✔ Tees
  - ✔ Lawn tennis
  - ✔ Fairways
  - ✔ Stadia pitches
  - ✔ Sports pitches
  - ✔ Outfields
  - ✔ Lawns
- Key
- ✔ Ideal for purpose
  - ✔ Suitable for purpose

All ingredients unique to **AI**CL in turf

## Gronamic 6-2-4 contains unique ingredients

### Polyhalite

**Extensive trial work** has confirmed that the principal nutrients of potash, magnesium and calcium in polyhalite are fully available to the plant, performing in trials with the same plant efficiency as standard individual sources of potassium and magnesium sulphate.

**Polyhalite has these minimum contents of:**

- Potassium 14%  $K_2O$  as from Potassium sulphate
- Magnesium 6%  $MgO$  as from Magnesium sulphate
- Calcium 17%  $CaO$  as from Calcium sulphate

Polyhalite is a low chloride fertiliser, and being a natural product with no chemical processing makes it suitable as an organic source of nutrients.

### Pearl Struvite

Struvite is recycled, slow-release phosphorus, derived from the water treatment industry.

**Sierrablen Plus with Pearl® Technology**

**Other high performing fertiliser**

**Independent trial data** has shown significantly increased rooting when Sierrablen Plus Pearl® struvite technology is used as a fertiliser during turf-laying. There was a 2.5 x increase in rooting when compared to another existing high-performing product.

### SMX Seaweed

SMX is sustainably sourced concentrated seaweed. During trials, SMX significantly increased total root surface area of Perennial ryegrass.

Perennial Ryegrass seedlings grown with nutrient control (equivalent NPK).

Perennial Ryegrass seedlings grown with one application of **SMX** at label rate.
