

## ICL Renovator Pro 14:0:5

### Premium Weed and Feed Moss Killer for Turf

MAPP No. 16803

LERAP: Category n/a

Contains: Fe & Herbicide

Sportsmaster Renovator Pro contains a selective herbicide for routine and heavy weed control and Iron for effective moss control. An ideal lawn weed feed and moss killer to apply in spring or early summer.

The label is approved for effective weed and moss control of many weed species.

#### Product Advantages:

- Renovator Pro is ideal for use during spring period when broad leaved weeds and moss are present and need controlling in one application
- Contains selective herbicide for routine and heavy weed and moss control
- Approved label for effective control of many species (see Product Information sheet for weed species)
- The moss in the lawn will blacken as it dies (the blackening of the grass will only be temporary). Thoroughly rake out the dead moss 7-14 days after treatment.
- The performance and longevity of Renovator Pro depends on both environmental factors and application rate.

*This is ideal for use with:* Lawns, Tees, Fairways, Amenity Areas, and Sports fields.

Renovator Pro controls the following weeds: Control common turf weeds such as Cat's Ear, Creeping Buttercup, Daisies and White Clover. Dandelions and Plantains are moderately susceptible. Resistant weeds are Common Bird's-Foot Trefoil, Field Woodrush and Mind-your-own-business (Baby's Tears).

#### Product Application:

- Apply to dry foliage and irrigate after 1 to 2 days if no rain has fallen.
- Irrigation will aid dispersion and minimise risk of mower pick-up on close mown surfaces.
- Avoid application during frosty or drought weather conditions.
- Watering in after application will minimise foot-printing risk.
- If spilt on paving slabs, concrete, clothes etc. brush off immediately, as product may cause discolouration.
- Delay verti-cutting and/or grooming for 3 days after application to allow the granules to disperse.
- For an even spread and accurate results apply with a quality fertiliser spreader.
- This will allow you to cover a larger area and ensure that you achieve an even coverage.
- Adjust the calibration on your spreader to the appropriate setting for 35g per sq.m (check spreader instructions for details).
- Simply fill your spreader and apply as normal.
- Make sure you slightly overlap the edges to prevent stripes.

<b>Pack Size:</b>	25 kg
<b>Type:</b>	Minigran.
<b>Slow Release:</b>	No
<b>Application Rate:</b>	35 g/sq. m
<b>Pack Coverage:</b>	714 sq. m
