

Super D Thatch

Application Rates and Timings

| | |
|---------------------------|---|
| Initial Treatment: | 3 applications, at 10L per Ha, every 10 to 14 days |
| Maintenance: | 10L per Ha every 20 - 30 days |
| Full Programme: | 60L per Ha (over 2 to 3 months) |

Make all applications in a water volume of 600 litres per Ha.

Do Not reduce the water volume as this restricts the movement of the product into the thatch.

Variations: Once microbial activity has been activated it is possible to vary rates and timings.

Super D Thatch is most effective over a 3 month period when combined with aeration

Health and Safety

Avoid contact with eyes.

In case of contact with eyes, rinse immediately with plenty of water and seek medical advice.

Conditions of Supply

All goods supplied by us are of the highest grade and we believe them to be suitable but, as we cannot exercise control over their storage, handling, mixing or use, or the weather conditions before, during and after application which may affect the performance of the goods, all conditions and warranties, statutory or otherwise, as to the quality or fitness for any purpose of our goods are excluded, and no responsibility will be accepted by us or re-sellers for any failure in performance, damage or injury whatsoever arising from their storage, handling, application or use. These conditions cannot be varied by our staff or agents whether or not they supervise or assist in the use of such goods.
