

RPR GOLF

Golf

Greenkeepers, Course Managers and Golf Course Superintendents rely on the Barenbrug Sport grass seed range designed for golf courses.

Tees, fairways, walkways, roughs

- Barenbrug-bred regenerating ryegrass technology (RPR)
- Exceptional wear tolerance
- Fast recovery
- Good aesthetics
- 100% Barenbrug perennial ryegrass
- Barenbrug-bred varieties only

MIXTURE:
100% perennial ryegrass

USAGE:
Overseeding, divoting and construction of golf turf with intense wear.

FEATURES & BENEFITS:
The unique component of RPR Golf is *Barlibro*, a **Regenerating Perennial Ryegrass (RPR)**.

RPR is a group of cultivars bred from Barenbrug's grass breeding stations that delivers unparalleled recovery from wear and naturally self-regenerating growth habit. It produces determinate stolons (a stem that grows along the ground surface as it establishes and grows as shown in Fig 1), resulting in solid ground cover and unparalleled capacity for recovery after and during wear.

Barprimum is an exceptional ryegrass for summer sports use. It is ranked very highly in both G4 and L1 tables of BSPB Turfgrass Seed 2024.

Barcristalla is a very strong performer under high traffic, with a top-25 ranking in Table S1 of Turfgrass Seed. It also exhibits good retention on winter colour and disease tolerance.

Specifications

Sowing rate	25-50g m ²
Oversowing rate	20-30g per m ²
Sowing depth	10-15mm < thatch
Mowing height	down to 12mm

Composition

50% Barlibro	RPR Perennial ryegrass
30% Barcristalla	Perennial ryegrass
20% Barprimum	Perennial ryegrass
