ROOTMORE[®] MYCORRHIZAL FUNGI

BIOSTIMULANTS
FOR INTENSIVE
ROOT GROWTH

ENHANCES ROSES,
TREES, SHRUBS &
EDIBLE PLANTS

Vitax Q4 Rootmore is packed with beneficial organisms and biostimulants to boost root growth and create healthier plants.

Mycorrhizal fungi form symbiotic relationships with plants. They live in or on the roots, extend their hyphae into the soil and make phosphate, nitrogen, other nutrients and water available to the host plant. They extend the effective root area many hundreds of times so plants grow faster, larger and stronger with less fertiliser and water.

This results in:

- Reduced losses during transplanting and quicker establishment
- Improved drought tolerance
- Reduced need for additional fertiliser
- Stronger, more resilient plants

This product contains a range of endomycorrhizal and ectomycorrhizal fungi, seaweed and humates in a natural mineral carrier.

DIRECTIONS FOR USE

When transplanting sprinkle Q4 Rootmore evenly into the bottom of the planting hole so that plant roots sit directly in close contact with the material. It is not necessary to add Q4 Rootmore to the backfill when planting. Water well after planting.

Pot/Container Size	Number of plants (Per 250g Pouch)	Amount per plant
2" (5 cm)	320	¼ tsp
4" (10 cm)	120	½ tsp
6" (15 cm)	40	1½ tsp
12" (30 cm)	8	6 tsp

1 teaspoon = 5 g (Approx)

Note: Q4 Rootmore is suitable for most flowers, vegetables, grasses, bulbs, fruit trees, shrubs, foliage plants, berries and nut trees but will not benefit brassica, laurel, rhododendron, azalea, blueberry, cranberry & loganberry.

Helpful Advice

Read the directions carefully before use.
Store in a cool dry place away from children, pets and foodstuffs.
Once opened reseal sachet and store in a cool dry place. Use within 1 year of opening.
Product may irritate cut or broken skin. Wash hands after use.
