

Kills ants & destroys nests

ANT BAIT STATION²

UK-2015-0926 IE/BPA 70346

Pre-baited stations to kill ants and their nests

Indoor & outdoor use

Clean and easy to use

Eliminates nests without mess

A ready for use liquid insecticide bait containing 0.081% w/w spinosad
An insecticide for consumer use
Indoor and outdoor use around domestic premises

ANT BAIT STATION²

UK-2015-0926 IE/BPA 70346

A ready for use liquid insecticide bait containing 0.081% w/w spinosad

Controls common black ants in and around the home.

Nippon Ant Bait is highly attractive to black 'worker' ants which collect the bait to feed the queen and other ants in the nest. The bait builds up within the colony and the entire nest is eliminated usually in 7 to 10 days.

DIRECTIONS FOR USE

Clear up other readily available foodstuffs. Remove bait station from pack and snap off the 3 lugs to open access holes to the bait. Place one or two bait stations on a flat surface, preferably in late evening, by the nest or ant run. Replace the bait station if exhausted. Ant activity will normally cease in 7 to 10 days. Do not disturb feeding ants, which pass Nippon on to the entire colony. Ants are only controlled if Nippon is the main food source.

Keep in a safe place. Do not open bait box. Do not use where food, feed or water could become contaminated. Allow at least 7 days between successive 28-day treatment campaigns. When used outdoors use at most 2 bait stations. Effective for 1 month.

Do not contaminate surface water or drains with chemicals or used container.

Do not re-use empty containers.

Store in original container. Shelf life up to 2 years.

Harmful to aquatic life with long lasting effects.
If medical advice is needed, have product container or label at hand.

Keep out of reach of children.

Read label before use.

Dispose of contents/container to a household waste recycling centre as hazardous waste except for empty containers which can be disposed of by recycling. Contact your local authority for details.

Contains 1, 2-benzisothiazolin-3-one. May produce an allergic reaction. To avoid risks to human health and the environment, comply with the instructions for use.

First Aid

Skin contact: No harmful effects anticipated from dermal exposure. Wash with soap and water.

Eye contact: Possible irritation. Rinse with water thoroughly. If irritation persists seek medical advice.

Ingestion: Low toxicity. Wash out mouth with soap and water and seek medical advice.

(IRL) For information or to report a poisoning incident contact The National Poisons Information Centre, Beaumont Hospital, Dublin (01-8092166), retain the label for reference.
