Super Concentrated BIG Tablet

Wetting and penetrating agent for treatment of Dry Patch and water repellent soils in amenity turf.

DIRECTIONS FOR USE

TIMING

Use 1 tablet per 2500 litre irrigation tank to treat 1 Ha of turf grass approximately.
Re apply every 2-3 weeks in the summer.

APPLICATION

Take the tablet out of its packaging and place in the irrigation tank.
Leave for 4 hours before using the irrigation system to allow the tablet to dissolve.
Coverage is only a guide and it is affected by water temperature, flow rate and tank size.

HEALTH AND SAFETY

Safety data sheet available for professional users on request.
