

TO AVOID RISKS TO MAN AND THE ENVORINMENT. COMPLY WITH INSTRUCTIONS FOR USE.

When to use:

Ferromex is an easy to use liquid Mosskiller and lawn feed to control moss AND encourage healthy growth of lawn grass. It is most effective when applied to actively growing lawns in moist conditions from early spring to early autumn. Do not use in drought, freezing conditions or when rain is imminent. Apply 3 days after and 4 days before mowing on a still day. Do not exceed recommended dose.

How to use:

Mark out area to be treated and apply evenly at the following rates:
Watering Can: 150ml into 9L of water to treat 10m²
Knapsack Sprayer: 150ml into at least 500ml of water to treat 10m²
Rake our dead moss when it has turned black, usually 7-14 days after treatment.
Re-treatment may be necessary for heavy moss infestation, or it moss

USE ONLY AS A LAWN TREATMENT	
Maximum individual dose:	150ml per 10m ² (150L/ha)
Maximum number of treatments:	3 per year
Latest time of application:	Early autumn
