FOR USE IN AND  
AROUND THE HOME

The Nippon Ant Control System eliminates ants without mess or trace. Ideal for household use the Nippon Ant Control System has been designed to destroy ants indoors and outdoors around domestic premises.

The unique Nippon Ant Killer Liquid<sup>®</sup> acts as lethal bait for ants. 3-4 drops squeezed into the bait station and placed along the ant run, or as near to the nest as possible, is the sure way to eliminate ants without mess or trace.

**N.B** Prior to applying Nippon Ant Killer Liquid<sup>®</sup>, pierce the 4 small indentations on station base with a sharp point to allow ants access to the bait.

#### DIRECTIONS FOR USE

Undo cap and pierce the end seal. Clear up other readily available foodstuffs. Place 3-4 drops (0.3-0.4g) of product per bait point, preferably in the late evening, into the refillable bait station by the ant run. Change the bait daily until ant activity ceases (usually 7 to 10 days). Replenish as necessary. Do not disturb feeding ants, which pass Nippon onto the entire colony. Ants are only controlled if Nippon is the main food source.

When used outdoors use a maximum of 3 refillable bait points. Effective for up to 1 month.

Wash hands and exposed skin before meals and after use. Prevent access to bait by children and animals. Keep in a safe place. Hazardous to bees. Do not use where food, feed or water could become contaminated. There should be an interval of at least 7 days between 28-day treatment campaigns.

Remove all remains of bait and bait containers. Do not contaminate surface water or drains with chemicals or used container. Do not re-use container (empty tube).

Store in original container. Shelf life up to 2 years.

To avoid risks to human health and the environment, comply with the instructions for use.

#### FIRST AID

**Skin contact:** No harmful effects anticipated from dermal exposure. Wash with soap and water.  
**Eye contact:** Possible irritation. Rinse with water thoroughly. If irritation persists seek medical advice.  
**Ingestion:** Low toxicity. Wash out mouth with soap and water and seek medical advice.

(IRL) For information or to report a poisoning incident contact The National Poisons Information Centre, Beaumont Hospital, Dublin (01-8092166), retain the label for reference.

Use Biocides safely and sustainably. It is illegal to use this product for uses or in a manner other than prescribed on this label.

#### FOR USE ONLY AS AN INSECTICIDE

Harmful to aquatic life with long lasting effects. Keep out of reach of children. Dispose of contents/ container to a household waste recycling centre as hazardous waste except for empty containers which can be disposed of by recycling. Contact your local authority for details. Contains 1, 2-benzisothiazolin-3-one. May produce an allergic reaction.
