

AIM for clean greens

A new Syngenta one-box fungicide solution is now available, providing a well-proven, cost effective and agronomically strong season-long disease control strategy.

Three leading Syngenta fungicides - Ascernity, Instrata Elite, and Medallion TL - work together to offer an effective sequential strategy from summer through winter. Tailor the sequence to your schedule for optimal turf performance.

Outstanding control of a broad-spectrum of key turf diseases

Contact and systemic action against major turf disease

Contact fungicide designed for use in the cooler months
