

Tank cleaner is a specially formulated liquid which removes pesticides, deposits and other debris including oily substances from tanks, booms, hoses, filters and nozzles.

- 1** 1Ltr per 200Ltr of spray tank.
- 2** Drain tank completely then flush tank, boom and hoses with clean water then drain again.
- 3** Half-fill tank with clean water and add Super Tank Cleaner. Flush through boom and hoses, then allow to stand for 10 mins. Drain completely.
- 4** Nozzles and filters must be removed and cleaned separately. Soak in a bucket containing 250ml of Super Tank Cleaner per 10Ltr of water.
- 5** Any contamination on the outside of the spray equipment should be removed by washing in clean water.
