

PRESTIGE®

PRESTIGE SUPER DEW CLEAR

DIRECTIONS FOR USE

Prestige Super Dew Clear will control dew formation on turf areas such as tees and greens. It can be applied all year round depending on the degree of dew formation. There is no need to water in after application, although it is advisable to irrigate the applied areas before mowing. If that is not possible then leave mowing basket off until rainfall occurs.

Prestige Super Dew Clear will typically give 1-3 weeks control depending on rates used, mowing frequency and climatic conditions. Apply with a boom sprayer or hand sprayer at the rates recommended in the table below. DO NOT TANK MIX PRESTIGE SUPER DEW CLEAR. Prestige Super Dew Clear must be thoroughly mixed prior to application.

APPLICATION RATES	100m ²	500m ²	Hectare
Prestige Super Dew Clear	12 - 20ml	60 - 100ml	1.2 - 2 litres
Water	4 - 6.6 litres	20 - 33 litres	400 - 660 litres

Prestige Super Dew Clear contains polyether modified trisiloxane (CAS 134180-76-0)
