

ColourPro

Indicator

An advanced spray pattern indicator to assist spraying and minimize spray drift.

Where needs take us

ColourPro

Indicator

Colour Pro Indicator is an advanced spray pattern indicator to assist spraying and minimize spray drift. Colour Pro Indicator has been formulated to provide the optimum conditions for the most accurate application of liquid sprays to turf and bare ground.

Key Points

- Premium blue indicator
- Low-staining formulation
- Contains anti-drift agent
- Sequestering agent to prevent lock up

Directions for use

For use with water based sprays only. The required turf colour may vary with turf height and other individual conditions, requiring slight adjustments to the recommended application rates. Correct preparation of the spray solution is important.

First add water to half fill the spray tank, then add the required volume of Colour Pro followed by the correct amount of product. Finally, add the other half of the required water volume.

When to use

Use whenever needed in spray applications to reduce the risk of overlapping or missed areas.

Recommended period of use

Year-round.

Product characteristics

Pack size: 1 litres

Packs per outer: 6 x 1 litres

Pack coverage: Variable

Health and safety

A Material Safety Data sheet is available on request.

Application rate

1 - 2.5 litres of Colour Pro Indicator in 1,000 litres of water.
