

Amino-Sorb® R

Root absorbed amino acid supplement for root growth,
enhanced germination and stress relief.

E002511/0207

BIOIBERICA
PLANT PHYSIOLOGY

Amino-Sorb® R

Directions for use

A root absorbed product for use on all types of sports and amenity turf which are subject to stress conditions e.g. golf greens, tees, bowling greens, cricket squares, tennis courts and soccer pitches.

Timing

Amino-Sorb® R is best used when the turf needs a nutritional and physiological stimulation such as: after aeration, top dressing, seed germination, root development, excessive salinity and stress periods. Apply in Spring & Autumn at 2-4 weeks intervals.

Application

Apply **Amino-Sorb® R** with a minimum of 500 litres of water per hectare.

Apply through conventional hydraulic spraying equipment fitted with coarse jets. Can also be applied through irrigation systems.

Half fill the spray tank with clean water, add the required amount of **Amino-Sorb® R** and mix thoroughly whilst adding the remainder of the water.

Product compatibility

Amino-Sorb® R is tank mix compatible with most other products including liquid fertilizers and organics. If tank mixing for the first time apply the combination to a small area first to establish safety and desired effects.

Precautions

Keep out of reach of children.
