

A slow release iron, magnesium and seaweed blend specifically designed to give an even, steady release ensuring plant strength and healthy colour, without promoting soft growth.

- 1 Application should be 35g/m².
- 2 If no rainfall within 48 hours then product will need to be irrigated in.
- 3 Avoid application in frosty conditions.
- 4 For optimum results, apply after cutting to allow maximum time for the granules to activate before the next cut.
- 5 1 – 2mm homogenous granulation.

Suggested spreader settings:

Accupro

- 6 Cone 6, Gate opening L applied in TWO directions gives a total of 35g/m².

Ev-N-Spred

Gate opening 10 applied in TWO directions gives a total of 35g/m².

(Fertilisers applied in two directions give a far more uniformed coverage).
