Super Hoze End Pellets

Wetting and penetrating agent for treatment of Dry Patch and water repellent soils in amenity turf.

DIRECTIONS FOR USE

TIMING

Apply during the spring to autumn period, subject to weather conditions.

APPLICATION

Hoze End Pellets are designed to be applied using an application gun. Take one pellet and place in the chamber of the applicator gun. Screw chamber into position and turn on water supply. The pellet will dissolve at a pressure of 60-90 psi.

OVERALL USE

One Hoze End Pellet per golf green.

SPOT TREATMENT

One Hoze End Pellet will spot treat 6-7 average sized golf greens (applied approximately 5-10 minutes per green)

6x250g
