

Clayton APT

A broad spectrum herbicide for use in non crop situations giving long term residual results.

For best results, apply Clayton APT before weeds germinate if weeds are present at time of application tank mix with a suitable Glyphosate herbicide when the weeds are small and actively growing.

Product Advantages

- Controls a wide range of grasses and broad leaved weeds
- Reduces the amount of Glyphosate applications on an area saving time and money
- Clear fence lines
- Low application rate 150 g per hectare
- Long residual effect
