# E13 - Coastal Areas

## Coastal lawns and landscapes - salt and drought tolerance

- Developed for coastal areas which are frequently composed of free-draining sandy soils, prone to drought and exposed raised levels of salinity

The E13 mixture delivers salt and drought tolerance for lawns and green spaces in coastal areas. Coastal areas are often subjected to saline conditions and drought; the species in the E13 mixture have been selected to tolerate these conditions. As well as excellent salt and drought tolerance, the E13 mixture is also durable thanks to the inclusion of perennial ryegrass.

- Tolerant of drought conditions
- Includes species that are tolerant of saline conditions
- Contains deep rooted and drought tolerant species
- Good levels of wear tolerance

### AREAS OF USE

- Coastal areas
- Public open spaces
- Urban areas
- Parks
- Lawns

## Specifications

Sowing rate	25 - 35g/m <sup>2</sup>
Height of cut	down to 15mm
Pack size	20kg

## Composition

- 40% Slender Creeping Red Fescue
- 30% Perennial Ryegrass
- 20% Tall Fescue
- 10% Hard Fescue
