

A blend of Nitrogen, Phosphate and Potash formulated for where Phosphate is required in a concentrated unique gel formulation.

Water rate: 1:12

The ideal ratio of Nitrogen, Phosphate and Potash. Complete is a good all-round standard for use throughout the year.

**Weight/Volume Analysis:** 300 grams N + 70 grams P + 220 grams K per litre

## Benefits

- Blend of Nitrogen, Phosphate and Potash
- Formulated for where Phosphate is required
- Concentrated unique gel formulation
- Easy storage and reduced packaging
- Formulated specifically for fine turf
- Spoon Feed or use as per the application guide to determine rate
- Easy accurate spray application
- Spray and Play
- Time saving
- 70 : 30 soil leaf uptake

## Application Guide

		Litres per 500 m <sup>2</sup>			
		1	5	10	15
per 500 m <sup>2</sup>	Kgs per 500 m <sup>2</sup> Nitrogen	0.30	1.50	3.00	4.50
	Kgs per 500 m <sup>2</sup> Phosphate	0.07	0.35	0.70	1.05
	Kgs per 500 m <sup>2</sup> Potash	0.22	1.10	2.20	3.30
	<hr/>				
		Litres per Hectare			
		10	20	30	50
per Hectare	Kgs per Hectare Nitrogen	3	6	9	15
	Kgs per Hectare Phosphate	0.70	1.40	2.10	3.50
	Kgs per Hectare Potash	2.20	4.40	6.60	11.00
