

A high quality soluble version which can be applied as a powder or as a liquid.

- 1 Application should be 20-30kg/Ha.
- 2 Applied as a powder 9g/m².
- 3 Powder / Soluble.
- 4 Dissolve product in warm water before adding to the spray tank. Dilute no more than 2kg in 10Lt water at a time.
- 5 Sulphate of Iron may contain small undissolvable particles.
- 6 Pass diluted mixture through a fine mesh filter (or even a cotton pillowcase) before it enters the spray tank.
- 7 Do not apply in frosty conditions.
- 8 Do not apply in high temperatures or drought conditions.
- 9 This product may leave footprints and wheel marks on the surface following spraying, this is only temporary and these will grow out.
- 10 Sulphate of Iron can stain non turf surfaces and clothing, please take care.
- 11 Always clean the sprayer after use with Prestige Super Tank Cleaner.
- 12 The high level of sulphur can cause wear to nozzles, ensure nozzles are checked and replaced regularly.
