

Leatherjacket Total Approach Pack

The Leatherjacket Total Approach Pack arrives in two separate boxes. This will treat an area of one hectare:

BOX 1 (A) CONTAINS:

- Acelepryn® - 0.6 litre
- NemaSpreader® - 5 litres
- Syngenta XC 08 Soil Nozzles set (white)
- Acelepryn 7-point plan
- NemaTrident F® Instructions for use

BOX 2 (B) CONTAINS:

- 5 x bags of NemaTrident F (500 million per bag)

Total: 2.5 billion nematodes
(place nematodes into fridge at 4-7°C on arrival)

1. **Refrigerate** NemaTrident F bags at **4-7°C** as soon as they arrive. Leave air space between bags if possible – baskets or racks will help.
2. Check weather conditions to **plan applications** as soon as possible following delivery of both boxes.
3. **Fit the XC 08 Soil Nozzles** to your sprayer in preparation.
4. Apply **Acelepryn** as described in attached the '**7-point plan**' for optimum results.
5. **Within 7 days** following your Acelepryn application, apply **NemaTrident & NemaSpreader** as per the '**NemaTrident F Instructions for use**'.
6. **Irrigate surfaces** immediately post NemaTrident application, to help move nematodes into the soil.
7. Keep soil **moisture raised** for the following **few weeks** to aid nematode movement and keep pests high in the soil profile.

For extra information visit the Syngenta turf website or **scan the QR code below** to see the NemaTrident tips video.

syngenta®

Syngenta UK Ltd. Registered in England No. 849037. CPC4, Capital Park, Fulbourn, Cambridge CB21 5XE.
