

Wetting and penetrating agent and concentrated seaweed in an easy to use tablet form. They are designed to be applied using an applicator gun, for the prevention and treatment of dry patch and water repellence in soils and amenity turf.

- 1** Application varies but expect to achieve about 3000m² per tablet.
- 2** In warm weather keep pellets in the fridge to prevent them breaking down too quickly.
- 3** Apply using the H2Pro Applicator Gun and Aquatrols Pellet Applicator.
- 4** The ideal water pressure is between 60-90psi.
- 5** Store between 0°C – 25°C and use within 24 months.
