

Controls difficult and invasive weeds

Synero is designed to control a wide range of deep-rooted, perennial and herbaceous weeds on non-crop lands including motorway and railway embankments, roadsides, non-agricultural grassland and industrial areas.

Synero quickly and effectively combats invasive, difficult-to-kill weeds, and is ideal to use as part of a vegetation management programme.

Key features

- ✓ Effective against a wide range of tough and invasive weeds including Japanese knotweed and budleii
- ✓ Use as part of a vegetation management programme with Icade
- ✓ Can be used as a spot treatment
- ✓ Safe for use on grasses
- ✓ Rainfast in one hour

Product characteristics

Formulation type	Liquid (E)
Technology	Selective herbicide
Pack size	3 litre
Pack coverage	15,000m ²
MAPP No.	18578
PCS No.	05394
Contains	30g/l aminopyralid and 100g/l fluroxypyr

Areas of use

- ✓ Golf rough/semi-rough
- ✓ Amenity grassland
- ✓ Motorway and railway embankments
- ✓ Roadsides and path verges
- ✓ Industrial areas
- ✓ Non-agricultural grassland (excluding airfields)

Application information

Application rate	2L/ha
